(57) Abstract :

The present invention relates to a mill wright fitters table (100) comprising of plurality of mild steel rods (110), wherein the said rods are basic load bearing pillars and L angles, wherein the said angles are fitted to frames thereby providing stability and load bearing capacity. The L angles are joined together by means of bolted and welded connections. In the present invention the table top (115) is made of wood and further comprises of slits (120) on the wooden plane for the anchor bolts of the machinery to fit into the table. The angles and mild steel pillars are treated to make them corrosion free.
