In the future we are planning to implement the ideas in our college which were shared with us in this trip by the experts such as starting an open-source lab, getting national accreditation and recognition for our college , career guidance and placement training for our students, helping our students and encouraging them to have creative and innovative ideas and encourage them to start working on them and on a lot of more other things that we learned in our trip to IBM campus.

We are really looking forward to having more of such visits to your organization to build upon this industry-university relation so that we create intelligent, innovative, creative, enthusiastic, productive and hard-working engineers.
Our deepest gratitude and thanks to all!
