Dear Sir,

I am writing this letter to thank you for the wonderful One day Workshop on "*Fabrication for Engineers*" that was organized on 24/01/ 2019. Not only was the workshop organized in an extremely professional manner but all the information that you shared about the fabrication techniques gave us a new perspective to the whole fabrication. The material that you provided and the discussions that were conducted were highly motivating. And what I personally liked about your fabrication techniques were the quality that you had created which made it very easy to understand the concepts.
